

## Learnscape works with the Chrome browser.

When you log into the Learnscape website click on **Home** before you log in. Scroll to the bottom of the page to see if Flash is enabled.

The screenshot shows the Learnscape website interface. On the left, there is a sidebar with a list of features: "Compatible with all major web browsers", "Computer and Tablet-friendly", and "Fun and easy to use". The main content area has a teal background and is titled "System Requirements". It includes a browser icon and text stating: "Use a modern web browser (Chrome, Firefox, Safari, or Edge) on a device with a 7.9-inch (diagonal) or larger screen and 1024x768 pixel or higher screen resolution. SkillsCOMPASS and GEDpathway products require a web browser and an 800x600 pixel or greater screen resolution, as well as Adobe Flash Player." Below this, a red box highlights the error message: "Flash Player: Could not be detected automatically." To the right of this message, a green dot is visible next to the "Screen Resolution: 1920x1080" status. Further down, there is a "Log In" section with a "Log in to LearnScape" button and the text "Only registered users may access LearnScape systems."

Compatible with all major web browsers

- Computer and Tablet-friendly
- Fun and easy to use

### System Requirements

Use a modern web browser (Chrome, Firefox, Safari, or Edge) on a device with a 7.9-inch (diagonal) or larger screen and 1024x768 pixel or higher screen resolution. SkillsCOMPASS and GEDpathway products require a web browser and an 800x600 pixel or greater screen resolution, as well as Adobe Flash Player.

Flash Player: Could not be detected automatically.

Screen Resolution: 1920x1080

### Log In

if your system requirements show green above, and you have received a username and password, you are ready to log in securely.

[Log in to LearnScape](#)

Only registered users may access LearnScape systems.

If you don't see the green dot next to Flash Player, Learnscape may not work properly.
